CORE COMPETENCIES

Patient Assessment and Clinical Monitoring

Electronic Medical Records (EMR) Documentation

Emergency and Critical Care Nursing

Medication Administration and IV Therapy

Patient Education and Discharge Planning

Wound Dressing and Pain Management

Infection Prevention and Control

Multidisciplinary Collaboration

BLS and ACLS Protocols

WORK EXPERIENCE

Staff Nurse (Pediatric, Gynecology, Medical & Surgical Wards)

Yashoda Group of Hospitals

Jul 2024 – Jan 2026

Hyderabad, Telangana, India

Achievements/Tasks

- Delivered comprehensive nursing care to pediatric, gynecological, medical, and surgical patients while ensuring compliance with hospital policies, patient safety standards, and evidence-based clinical practices.
- Performed thorough patient assessments, monitored vital signs, evaluated patient conditions, and promptly communicated clinical changes to physicians.
- Administered oral, intravenous, intramuscular, and subcutaneous medications while maintaining accurate medication administration records.
- Assisted physicians during medical procedures, emergency interventions, and surgical treatments using aseptic and sterile techniques.
- Provided high-quality preoperative and postoperative nursing care, ensuring patient comfort, pain management, and recovery monitoring.
- Monitored IV infusions, fluid balance, oxygen therapy, ECG readings, and patient responses to treatment.
- Maintained complete Electronic Medical Records (EMR), nursing documentation, patient progress notes, and clinical reports with high accuracy.
- Implemented infection prevention and control protocols to reduce healthcare-associated infections and maintain patient safety.
- Operated medical equipment including ECG machines, infusion pumps, syringe pumps, defibrillators, glucometers, pulse oximeters, suction apparatus, and oxygen therapy devices.
- Educated patients and family members regarding disease management, medication adherence, discharge planning, rehabilitation, and preventive healthcare.
- Responded effectively to medical emergencies by performing Basic Life Support (BLS) and assisting Advanced Cardiac Life Support (ACLS) teams.
- Collaborated with multidisciplinary healthcare professionals to develop individualized patient care plans and improve clinical outcomes.
